

3.2.1.2.10 Maintenance Material

Change Release Communication May 2019
Valid from Jan 1, 2020 for all reporting events

Definition

Costs (including inbound freight) relating to the usage of materials purchased for use in the maintenance of production and distribution equipment (e.g. activities to maintain and restore the desired status and to define and assess the actual status of technical assets).

'Maintenance Material' includes:

- Spare parts used for instrumentation
- Mechanical, electric, heavy vehicle equipment
- Light vehicle equipment
- Plant buildings and process control systems
- Contractor services material
- Oil and lubricant
- Small tools and equipment
- Cleaning material
- Screens (process control system screens)
- Drums
- Hoppers
- Conveyors
- Extension pipes
- Filter bags and clothes (filter press)
- Compressor hoses
- Couplings
- Big roller bearings
- Girth gears
- Pinion
- Main gear reducers
- Internals for main gear boxes
- High voltage electrical motors
- Rotor for DC-motors
- Spare set for DC-motors
- Process fan rotors
- Roller assembly for roller mill

- Gas analyzer spare set
- Electrical transformers
- High voltage switch gears
- Crusher rotor
- White metal bearings
- Fuels and water system pumps
- Tyres for production and distribution vehicles e.g. Ready-Mix Concrete truck
- etc.

Compulsory Sub-Type of Cost

- **Lubricants**
Lubricants cost (including inbound freight) relating to the usage of lubricants purchased for use in the production and distribution activities including: standard greases, conventional oils, open gear lubricants and lubricants for special applications.

3.2.1.2.10 Maintenance Material

Change Release Communication May 2019
Valid until December 31, 2019
