Mobisys Solution for smartphones

1. You can find software to be installed in your Android device in the following link:
   https://drive.google.com/drive/folders/0B4gADpghqR7ueHUtdzlSTkc0NHc

Easier way is to send this link to your mobile device,and download and execute the.zip from the device itself.

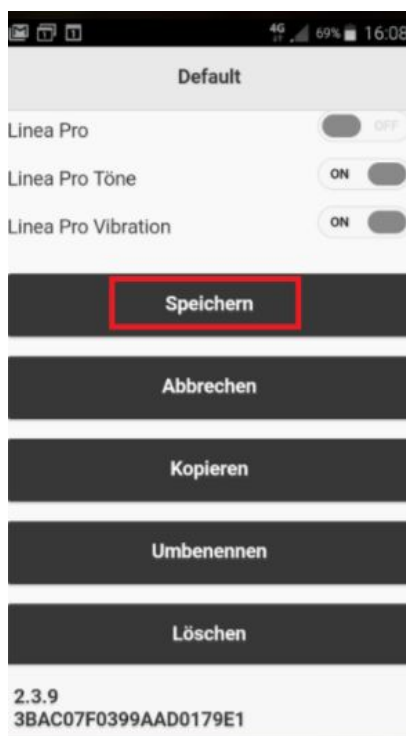

In case of iPhone, you have the app to be downloaded in the Apple App Store.

2. Now, you should change app language (by default, it is in German)

Select EN and press button "Speichern" (Save)

3. Change Settings / Configuration in order to connect to SAP

IP: SAP IP Address
Port: SAP Port System
Service: /MOBISYS/MSB_SAPUSER
Language: EN
Application: HO1

Then, Save.

4. Contact MAN Team with Device Number, in order to configure it in SAP:

Once SAP Tasks are performed and confirmed by MAN Team, you will be able to enter in Mobisys introducing your user and pwd.

Examples of the Tool usage
